Comments:
The inspection was conducted with Trevor Lewis (VT Agency of Agriculture). The farm has 200 heifers year-round, and up to 450-500 heifers during the winter months. The following issues were noted: (1) The farm's silage leachate collection system, which was added a few years ago, had a build-up of solids which required clean-up & maintenance; (2) The manure pit was nearing capacity, but still had some space for additional manure storage.
